Section B (30 marks)

Answer **one** question only from this section.

6 Ecological validity refers to the extent to which research relates to everyday life. For studies carried out in a laboratory, ecological validity can be difficult to achieve.

Using the studies from the list below, answer the questions which follow.

Bandura, Ross and Ross (aggression)
Dement and Kleitman (sleep and dreaming)
Milgram (obedience)
Samuel and Bryant (conservation)

(a) To what extent do each of these studies have ecological validity? [10]

(b) What problems may psychologists have when they try to achieve ecological validity? [10]

(c) Is it possible to achieve ecological validity in laboratory studies? Give reasons for your answer. [10]

7 Reductionism is when psychologists try to explain complex human behaviour and experience by studying the simpler component parts.

Using the studies from the list below, answer the questions which follow.

Baron-Cohen, Leslie and Frith (autism)

Hraba and Grant (doll choice)

Schachter and Singer (emotion)

Taifel (intergroup discrimination)

(a) To what extent could each of these studies be considered to be reductionist? [10]

(b) What are the strengths and weaknesses of using reductionism in psychological research? [10]

(c) Discuss the extent to which reductionism is useful in psychology. Give reasons for your answer. [10]

8 Some psychological studies provide useful explanations of mental processes and behaviour.

Using the studies from the list below, answer the questions which follow.

Loftus and Palmer (eyewitness testimony)

Freud (little Hans)

Sperry (split brain)

Rosenhan (sane in insane places)

(a) Outline what each of these studies tells us that is useful. [10]

(b) What problems may psychologists have when they try to conduct useful research? [10]

(c) Should all psychological research be useful? Give reasons for your answer. [10]
