## MARK SCHEME for the October/November 2010 question paper

## for the guidance of teachers

## 0620 CHEMISTRY

0620/61 Paper 6 (Alternative to Practical), maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2010 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

	Page 2			cheme: Teachers' version	Syllabus	Paper
			IGCSE	– October/November 2010	0620	61
1	(a)	ethanol a	[1]			
	(b)	arrow to	[2]			
	(c)	to prever effect of	[2]			
			[Total: 5]			
2	(a)	to speed	up the reaction			[1]
	(b)	solid visi	ble owtte	e.g. no more solid will dissolve		[1]
	(c)	filtration	/ centrifuge	not decant		[1]
	(d)	to make so crysta	[1]			
	(e)	no heat r carbonat	[max 2]			
				te that carbonate is in excess (1)		[Total: 6]
3	(a)	idea of fa	air test / only on	e variable		[1]
	(b)	nitric acio	[1]			
	(c)		ts plotted (3), – oth curve (1)	1 for each incorrect		[4]
		(ii) valu	e from graph 18	s (1) indication on graph (1)		[2]
	(d)			action quicker (1) rgy / increased collisions (1)		[2]
						[Total: 10]
						- •

	Page 3		Mark Scheme: Teachers' version		Syllabus		Paper			
4	10, 11, 1	IGCSE – October/November 20100620total volume of water boxes correctly completed (1)10, 11, 12, 13, 14temperature boxes completed (4) –1 each incorrect								61
	68, 63, 5	3, 63, 59, 55, 51							[5]	
	poir	<ul> <li>appropriate scale for y-axis (1)</li> <li>points plotted correctly (4), -1 for each incorrect</li> <li>best fit straight line graph (1)</li> </ul>							[6]	
	<b>(b)</b> clea	clear liquid formed / no solid visible owtte					[1]			
	• •	value from graph for 9 cm <sup>3</sup> of water, around 72 °C (1) extrapolation of straight line shown (1)						[2]		
		) temperatures at which crystals appear lower (1) solution more dilute in same volume of water / less saturated owtte (1)						[2]		
	<b>(e)</b> ske	tch gr	raph bel	ow line (1)	label (1)					[2]
	don do i	i't use not re seco	e a beak move th	ermomete	vater to coo r from the so ethod to not		of crystals	1		
	diffe loss obs	linked explanation different rate of heat losses / loss of solid on thermometer / observing formation of first crystals may vary /								
	mea	average mean more accurate / increases reliability <b>not</b> just accurate					[2]			
										[Total: 20]
5	(a) (i)	blue	(1)							[1]
	(ii)	blue	(1) pre	cipitate (1)						[2]
	(iii)		precipita o / royal		olution (1) <b>c</b>	or precipitate	e dissolves	3		[3]
	<b>(c)</b> sulf	uric a	icid (2)	acid or su	llfate only (1	)				[2]
										[Total: 8]
