### MARK SCHEME for the October/November 2012 series

### **2059 PAKISTAN STUDIES**

2059/02

Paper 2 (Environment of Pakistan), maximum raw mark 75

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2012 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

Page 2		Mark Scheme	Syllabus	Paper
		GCE O LEVEL – October/November 2012	2059	02
(a) Stu	udy Fi	g. 1 which shows mineral extraction in 2008 in F	Pakistan.	
(i)	Nam	ne two minerals shown on Fig. 1 that are used to	make cement.	[2]
	lime: gyps	stone sum		
(ii)	Stat	e two uses of rock salt.		[2]
	Do r	not credit vague answers such as 'food' 'chemicals'	'textiles' 'pharmad	ceuticals' etc.
	Food Text Chei	of the following (there may be others) d - Flavour, preserving, curing, table salt iles - dyeing, bleaching, water softening, micals - Soda ash, sodium bicarbonate, artificial rub c Tanning, household cleaner, fire extinguisher, art	-	ds etc.
(iii)	Stat	e the amount of gypsum extracted.		[1]
	640	- 680 <u>thousand tonnes</u>		
(b) Stu	udy Fi	g. 2 showing chromite production.		
(i)	2	cribe the changes in production from 1992 to 20	08.	[3
	Varia com varia Rise Seco Low	eases overall able overall / 1992-2008 ment on fall and rise from 1992-97/98 able 1998 – 2004/5 s from 2004-2008 / sharp rise in 2007 ondary peak 1996-1998 / rises then falls 1996-1999 est 1994 res to illustrate one of the above (max 1) eg. 28,000		1992-2008
(ii)	Sug year	gest why the production of minerals, such as	chromite, varie	s from year to [3

Investment / funding Demand / orders Bankruptcy / companies leave Problems with machinery Reserves reducing /new reserves exploited /geological problems Terrorism

Page 3	Mark Scheme	Syllabus	Paper
	GCE O LEVEL – October/November 2012	2059	02

#### (c) Study Photograph A (Insert)

(i) With reference to the photograph and using your own knowledge, describe the environmental problems that can be caused by mineral extraction. [4]

From photograph - loss of vegetation / deforestation Land deformation / piles of rocks /pits Loss of soil Dust

Own knowledge-smoke / gasses Soil erosion Loss of farmland / grazing / no cultivation Holes / pits etc. Noise / vibration (reserve one mark for reference to photograph)

#### (ii) How can these problems be reduced?

[4]

Laws / legislation+ details Tree planting / screens + details Land restoration + details Personal health and safety – eg wearing masks against the dust, ear defenders, regular medical check ups, etc (allow up to two marks for each line)

## (d) To what extent can more extraction of mineral resources help to increase development in Pakistan? [6]

In favour (res. 2) Increase trade / exports / reduce imports Raise GDP/GNP/ increase the economy Increase employment Raise taxes/ government earnings Foreign investment Rural development Industrialisation / more industry Better infrastructure + example Provides more fuel or raw material + example. Education / skills

Against (res. 2) Lack of funds Lack of machinery / technology Unattractive to investors In remote areas Lack of infrastructure ( but do not double mark) Competition from other countries / other countries safer Environmental damage Lack of skills / expertise

Page	4	Mark Scheme	Syllabus	Paper
		GCE O LEVEL – October/November 2012	2059	02
(a) Stu	udy Fi	ig. 3, showing the climate of Karachi.		
(i)	By ł	now much does the temperature rise from Janua	ary to May?	l
	12 <u>°C</u>	2		
(ii)	How	v does the amount of rainfall change from Octob	er to March?	l
		eases		
		ady / constant / regular 12mm / by 2mm per month		
(iii)		reference to Fig. 3 describe the climate of the r	months June to S	Sentember
(111)		·		
		i <u>perature</u> n / warm hot		
	29 –	31°C / average 30°C		
	•	est in June change in temperature		
	<u>Rair</u> High	itali i (accept July-September)		
	20 –	85mm		
		le increase in July / July max reasing after July		
	Tota	l 170-185 mms		
	<u>Allo</u>	w a mark for 'temperature drops (in July) when rainf	all increases	
(b) Ex	plain	the causes of the monsoon at Karachi.		
	•	ssure develops over land mass / air rises over land		
		wind from high pressure area		
Мс	oisture	-bearing /wet winds /carrying rain / humid		
	se ove ols	r land		
		condenses / clouds form		
(c) (i)	Nam	ne the violent storms that form over the sea and	that may affect <b>P</b>	Karachi.
	Cycl	ones / Typhoons / Hurricanes		
(ii)	In w	hich months may these occur?		I
	Apri	/ May / June / Sept / Oct / November		
	Apri	/ May / June / Sept / Oct / November		

Page 5	Mark Scheme	Syllabus	Paper
	GCE O LEVEL – October/November 2012	2059	02

## (iii) Explain how storms such as these may affect industry and communications in urban areas. [6]

NB. Answer must refer to storms in urban areas, therefore no ref. to farming or its products No reserves Flooding / heavy rain / high waves/ high tides} Strong winds } Weather associated with the storm Lightning strike } Damage or closure of buildings / roads / bridges / airports Lack of deliveries port activity Loss of production / work stops Lack of labour / cannot get to work Lack of experts / investors linked to airports being closed Lack of (tele)communication Loss of power - electricity

# (d) Read the article below. Assess the possibilities for electricity generation other than by fossil fuels at Karachi. [6]

The article refers to waves/tidal, wind, sun and waste, but there may be reference to others eg nuclear power.

The answer should make reference to the suitability of Karachi as a coastal location / just north of the Tropic of Cancer

Possibilities (Res 2)

Arabian Sea - so wave and tidal power Windy coast - so wind turbines, windmills Sunny weather - so solar Waste - so possibilities of burning waste Port / industrial so nuclear ie.there is a port for importing uranium, water for cooling, there already is a nuclear power station in the area Geothermal Energy Pakistan is near a plate boundary, active geological zone

#### **Problems**

Arabian Sea is in the extreme south / away from other large towns (res. 2) Wind turbines may obstruct shipping / fishing Winds do not blow all the line / with a regular speed Sun does not shine at night / can be covered by clouds Burning waste causes air pollution Problems of nuclear power (Sethi page 127) Low output from these generators (except nuclear) Modern technology needed for geothermal energy

Problems must concern people and environment of Karachi.

	Page 6			Mark Scheme Syllabus		Paper	
				GCE O LEVEL – October/November 2012	2059	02	
3	(a)	Stu	dy Fi	g. 4.			
		(i)	Nam	e the irrigation system shown in Fig. 4		[1]	
			Kare	Z			
		(ii)	Nam	e an area of Pakistan where it is used.		[1]	
				chistan n Valley / Turbat /Miri / Sharak			
	(	iii)	Exp	ain how this system provides water for agricult	ure in this area.	[4]	
			drair trave reac tunn	falls in mountains hs to the foothills / sinks into ground / groundwater / els in tunnels / underground canals hes surface / oases els need maintenance ed by groups of farmers	,		
	(	iv)	Nam	e a fruit crop grown in this area.		[1]	
			date	s / apricot / apple / grapes / peaches / melons			
	(b)	Stu	dy Fi	g. 5 showing the results of a survey in 2008.			
		(i)	Wha	t percentage of land is cultivated?		[1]	
			37/3	38			
		(ii)	Wha	t percentage of land is waste?		[1]	
			13/	14/ 15			
	(	iii)	Exp	ain how soils are damaged by waterlogging and	d salinity.	[4]	
			Seep Wate Wate Evap hard salt	sed by too much irrigation water / misuse of water b os from canals er table rises / soil becomes too wet / puddles of wa er rises upwards carrying salts porates causing salinity crust forms / salt patches poisons crops / crops die as cannot breathe in waterlogged soil	-		

Page 7	Mark Scheme	Syllabus	Paper
	GCE O LEVEL – October/November 2012	2059	02

## (iv) Explain three reasons, other than by waterlogging and salinity, why over half the land was not cultivated when the survey was made. [6]

Pasture - grazing Fallow – to allow soil to rest Low rainfall / away from canals / desert --infertile, plants cannot grow, no soil Mountains – steep slopes / lack of soil (accept rugged) Forest – need for Rivers - may flood Residential / housing - for large population Industry – factories need large space Commercial – eg. city centres Mineral extraction - plus waste Pollution – crops die Roads, railways, airports - for communication Damage – eg. deforestation, pollution Wasted by landlords Very cold 1 mark for reason, 1 mark for explanation.

#### (c) To what extent could government action increase agricultural production in Pakistan?

[6]

[3 × 2]

Possibilities (res. 2) Improve education eg. model farms, travelling advisors, training centres, colleges Loans eg. for machinery, HYV, fertiliser Subsidies eg. for imported machinery, fertiliser prices lower More fertiliser / pesticides factories or imports More machinery factories or imports Land reforms eg. consolidation Improve water availability eg. reservoirs, canals Cure of waterlogging and salinity eg. SCARP Weather forecasts Media eg. radio, TV

Problems (res. 2) Lack of money Illiteracy High population Other calls on government investment / attention Fears of unemployment due to mechanisation Land reforms may fail due to corruption / power of landlords etc.

	Page 8					k Scheme		Syllabus	Paper
				GCE O	LEVEL – C	October/No	ovember 2012	2059	02
4	(a)	Stu	ıdy Fi	ig. 6.					
		(i)	Nam	[3]					
			В	Quetta Gujranwala Multan	9				
		(ii)	Des	cribe the c	listribution	of cotton	processing cent	tres.	[3]
					<u>g centres / f</u> Punjab) / R				
			Sout Nort KPK	thern / Low hern / Upp ( / NWFP e		g. Hyderaba . Sukkur, La r, Nowsher		I AREA	
	(b)	Stu	ıdy Fi	ig. 7.					
		(i)	Con	npare the o	outputs of c	cotton yarı	n and cotton clo	th from 1999 to 2	2008. [2]
			Both Both		rp increase		ntinues to increa	se	
		(ii)	-	-	reason for our answer.		ence in output o	of cotton yarn ar	nd cotton cloth, [2]
			Yarr Prot (Eg. More	n is made ir blems / less loadshedd	nto cloth investment ing, old mac for yarn (wor	t/ in cloth w chines)	weaving mills eaving factories	/ machinery	
	(c)	(i)		e an exar on industr	• •	ob in the	primary, secon	dary and tertiar	y sector of the [3]
				•		yeing, spin	ning, weaving		
		(ii)	How	/ are the p	roportions	of workers	s employed in ea	ach of these sect	
			More	s in primary e / less in s e in tertiary	econdary				[3]

Page 9	Mark Scheme	Syllabus	Paper
	GCE O LEVEL – October/November 2012	2059	02

#### (iii) Explain why the changes you have stated in (c)(ii) may lead to unemployment. [3]

Lack of literacy / illiteracy Lack of skills for machines More mechanisation / fewer workers needed with mechanisation Computers faster than writers / more IT in offices Can use foreign workers Less work in rural areas

# (d) To what extent will improvements in education benefit both the rural and urban people of Pakistan? [6]

#### Benefits (res.2)

Will increase literacy / skills / can read eg. government advice Better paid jobs / can work in the professions / can use machinery / skilled Better farm outputs / income for farmers Better understanding of family planning / hazards of overpopulation Better health / more doctors, nurses, clinics etc. Better living standards / better hygiene, sanitation etc.

<u>Problems (res. 2)</u> Lack of jobs for educated people Loss of skilled workers eg. teachers, doctors Break-up of families through rural-urban migration General problems of too many people

	Page 1	0	Mark Scheme GCE O LEVEL – October/November 2012	Syllabus 2059	Paper 02
5	(a) Stu	ıdv Fi	g. 8 showing birth and death rates in Pakistan 1		02
-	(i)	-	e the birth rate and death rate in the year 2005.		[2]
		26 <u>p</u>	er thousand, 7 per thousand		
	(ii)	By h	now much has each decreased since 1990?		[2]
		13 <u>p</u>	er thousand, 3 per thousand or percentages 33% a	and 30%	
	(iii)	Exp	lain why both the birth and death rates have fall	en in Pakistan.	[6]
	(b) Stu	Bette Bette Lowe Relig Less Old   Bette Bette Bette Heal (res	er family planning / awareness of overpopulation er education of women / fewer early marriages more er access to / use of contraceptives er infant mortality gious advice changed / no longer 'Allah gives Rizq' s need for child labour people living longer er access to medication eg. vaccination er food / nutrition er hygiene / access to clean water er housing e materialistic attitudes hthy lifestyle / people take care of their health 2 each for specific reference to birth and death rate		ls / clinics
	(i)	Des	cribe the main changes in birth rate from 1941 to	o 2000.	[4]
		Deci Incre by a	rall decrease reased 1941 – 1972 eased to 1981 large amount / steeply / almost back to 1940 level reased to 2000		
	(ii)	Com	plete the following		[2]
		NAT	URAL INCREASE = Birth rate minus death rate		
	(iii)		dy Fig. 9 again. Underline the year in which th greatest. 1941, 1972, 1981, 2000	ne natural popula	ation increase [1]
		1981	1		
	(c) (i)	Exp	lain the difference between emigration and imm	igration.	[2]
		-	gration – moving away from an area / country igration – moving into an area / country		

Page 11	Mark Scheme	Syllabus	Paper
	GCE O LEVEL – October/November 2012	2059	02

### (iii) Explain the advantages and disadvantages of international emigration for the people of Pakistan. [6]

Advantages (res. 2) Can earn higher income / better prospects Remittances sent home Jobs for educated eg. doctors, engineers, university lecturer Jobs for construction in Middle East / domestic, restaurants, shops in Malasia Better living condition eg. housing, electricity, sanitation etc. Social benefits eg. education, healthcare etc. Religious freedom Better food

Disadvantages (res.2)

Loss of educated workers eg. doctors, teachers Qualifications may not be accepted / language problems High cost of living abroad Prejudice eg. thought to be extremist Too many people there already Need for permits eg. to enter country, work permit Exploited by traffickers / poor working and living conditions etc. Homesick / different culture etc.
