UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS GCE Ordinary Level

MARK SCHEME for the October/November 2006 question paper

5070 CHEMISTRY

5070/04

Paper 4 (Alternative to Practical), maximum raw mark 60

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

The grade thresholds for various grades are published in the report on the examination for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses.

CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2006 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Page 2	Mark Scheme	Syllabus	Paper
	GCE O LEVEL - OCT/NOV 2006	5070	04

1 Pipette (1) [1] 2 (a) (i) blue (1) (ii) red (1) (iii) hydrochloric acid (1) (b) (i) C (1) Ammonia travels faster than Hydrogen Chloride (1) rate is inversely proportional to molar mass or density (1) Ammonia is lighter than hydrogen chloride so travels faster (not further). (2) <u>or</u> NOT aqueous NH₃ is lighter etc. NOT ammonia is smaller etc. Incorrect position e.g. A, but chemistry correct loses 1st mark Incorrect position with consequential correct reasoning but incorrect chemistry loses all three. (ii) Diffusion (1) (iii) NH₄C*l*, ammonium chloride (1) $Y (NH_3)$, X (HCl) (both) (1) both are soluble (1)(c) HC1 more dense, NH₃ less dense than air (1) (must compare with air). Y and X reversed but correct chemistry loses 1st mark but incorrect chemistry loses all marks. X, Y and Z incorrect but two correct statements for one of the gases. e.g. HCl denser than air and soluble in water – 1 mark. NH₃ and HCl given no letters but chemistry correct loses 1st mark. [11] 3 (a) water flowing in wrong direction or water coming from wrong side etc. (1) (b) condenser (1) to return reactants to reaction flask, or prevent reactants escaping, or condense vapours back to liquids. (1) (not just to condense or cool) (c) (i) CH₃CH₂CH₂OH showing all bonds (1) (1 H missing on structure but bond shown accept, but not on OH group and no more than 1 H). (ii) acidified potassium dichromate(VI) (1) or acidified potassium manganate(VII) (1) (accept potassium dichromate or potassium permanganate) accept H⁺/Cr₂O₇²⁻ or acidified dichromate etc. (iii) orange (1) to green (1) or purple (1) to colourless (1) (d) propan-2-ol (allow prop-2-ol, 2-propanol (1), and propane-2-ol) CH₃CH(OH)CH₃ showing all bonds (1) [9] 4 to 8 (a), (c), (a), (d) 1 mark each [5] Test 1 transition metal present (1) (a) and (b) Fe²⁺, Fe⁺² or Fe(II) ion present (1) both. Test 2 (c) warm the solution from (b) or warm with aq. NaOH (1) gas or ammonia evolved (1) test for ammonia (1). (addition of aluminium loses first mark only, so long as warm and aq. NaOH aq. Ba $(NO_3)_2/HNO_3$ or aq. Ba Cl_2/HCl (2) white ppt. (1) Test 3 No acid or just acidified loses acid mark. Incorrect test loses all marks Use of BaSO₄ or H_2SO_4 with white ppt. – 1/3 only. Use of $Pb(NO_3)_2$ with white ppt. – 2/3 marks If formulae used it must be correct. [8]

	GCE O LEVEL - OCT/NOV 2006	5070	04

```
(a)
          4.73 g (1)
   (b)
          yellow to orange, red, pink (1)
   (c)
                   25.2
                                   38.3
                                                    28.2 1 mark for each row
                    0.0
                                   13.6
                                                     3.7 or column or (3) (mark
                   25.2
                                   24.7
                                                    24.5 either rows or columns)
                Mean value = 24.5 \text{ cm}^3 (1)
   (d)
          0.00246(1)
                                               (e) 0.00246 (1)
   (f)
          0.0246(1)
                                               (g) 0.05 (1)
          0.0254 (1)
                                               (i) 0.432 (1)
   (h)
          0.432 \times 1000/4.73 = 91.3 g(1)
   (j)
          A.E > 1% loses 1 mark, max. 2.
                                                                                                              [13]
          (h) if answer is negative it must be shown.
10 (a)
          Relights a glowing splint (1)
          32, 52, 64, 70 all correct (2) one error (1)
   (b)
   (c)
          points plotted (as shown in table) correct (1)
          two curved lines (1) points connected by a series of lines (0)
          passing through zero (1)
                32 cm<sup>3</sup> (1)
   (d)
          (i)
                59 - 47(1) = 12 \text{ cm}^3(1)
          (ii)
          If answer only check graph. If correct 2 marks.
          If answer only but no evidence on graph 0 marks.
```

If wrong answer check graph. If points are as stated but at incorrect time value and

(e) speeds up reaction/catalyst (1)

subtraction is correct 1 only.

(f) (i) reaction complete, finished or at the end-point or similar (1)

Not stopped

Any reference to CuO being used up loses the mark.

Answers to (d)(i) and (ii) as per candidates graph.

All plots and answers to (d) must be to nearest ½ small square.

(ii) Molar mass of $KC_1O_3 = 122.5$ or $2 \times KC_1O_3 = 245$ (1) 2×122.5 g gives 3×24 dm³ = 72×000 cm³ oxygen $72 \times cm^3$ is produced from 0.245 g (1) correct answer gets both marks.
