## **CAMBRIDGE INTERNATIONAL EXAMINATIONS**

GCE Advanced Subsidiary Level and GCE Advanced Level

## MARK SCHEME for the May/June 2013 series

## 9701 CHEMISTRY

9701/31

Paper 31 (Advanced Practical Skills 1), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

|        | GCE AS/A LEVEL – May/June 2013 | 9701     | 31    |

|          | T-                |                                                                                                                                                                                                                                                                                                                                                                                                                             |            |  |
|----------|-------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|--|
| (e)      | ACE improvements  | Accuracy of temperature measurement – use a 0 to 50 °C thermometer or a thermometer with smaller scale divisions (not just more accurate/ electronic thermometer/parallax).  Uncertainty about where the lines cross – sample more values of <b>FA 2</b> in the region of the intersection.  Repeat/ extra readings on LHS of intersection/ near maximum.  Initial temperatures of acid and alkali not same – measure both. |            |  |
|          |                   | Other answers acceptable if <b>specific</b> .                                                                                                                                                                                                                                                                                                                                                                               |            |  |
|          | _                 | [                                                                                                                                                                                                                                                                                                                                                                                                                           | Total: 15] |  |
| 2<br>(a) | MMO<br>collection | I Initial and final volumes recorded for rough AND initial, final and volume added recorded for accurate titre.                                                                                                                                                                                                                                                                                                             | 1          |  |
|          | PDO recording     | II All accurate readings recorded to 0.05 cm <sup>3</sup> .  Do not award if 50(.00) is used as an initial burette reading; more than one final burette reading is 50.(00); any burette reading is greater than 50.(0).                                                                                                                                                                                                     | 1          |  |
|          | MMO decision      | III Two uncorrected accurate titres within 0.1 cm <sup>3</sup> . Do not award if, having performed 2 titres within 0.1 cm <sup>3</sup> , a further titration is performed that is >0.1 cm <sup>3</sup> from the closer of the original 2 titres unless a further titration has been carried out which is within 0.1 cm <sup>3</sup> of any other.                                                                           | 1          |  |
|          | MMO quality       | IV + V Award 2 marks if difference from Supervisor within 0.20 cm <sup>3</sup> .  Award 1 mark if difference from Supervisor within 0.50 cm <sup>3</sup> .                                                                                                                                                                                                                                                                  | 2 [5]      |  |
|          |                   | Examiner compares candidate mean titre with Supervisor mean titre. If best titres are ≥ 0.5 cm <sup>3</sup> , cancel one of the Q marks.                                                                                                                                                                                                                                                                                    |            |  |

| (b) | ACE interpretation              | Calculates the mean to appropriate decimal places. The mean should normally be quoted to 2 dp rounded to the nearest 0.01. Example: 26.667 must be rounded to 26.67.  Two special cases where the mean may not be to 2 dp: allow mean to 3 dp only for 0.025 or 0.075 e.g. 26.325; allow mean to 1 dp if <b>all</b> accurate burette readings were given to 1 dp and the mean is exactly correct. eg 26.0 and 26.2 = 26.1 is correct but 26.0 and 26.1 = 26.1 is incorrect.  Note: the candidate's mean will sometimes be marked as correct even if it is different from the mean calculated by the Examiner for the purpose of | 1    | [1]     |
|-----|---------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|---------|
| (c) | ACE interpretation  PDO display | assessing accuracy.  All answers correct. (i) 0.15 × (b) /1000 (ii) (i)/2 (iii) (ii) × 400  Working shown in (i) and (iii)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 1    |         |
|     | PDO display                     | All answers given to 3 or 4 sig figs (minimum 2).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 1    | [3]     |
