## MARK SCHEME for the May/June 2013 series

## **5090 BIOLOGY**

5090/31

Paper 3 (Practical Test), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

Mark schemes will use these abbreviations

- ; separates marking points
- o *I* alternatives
- () contents of brackets are not required but should be implied
- **R** reject
- **A** accept )for answers correctly cued by the question, or guidance for examiners)
- Ig ignore (for incorrect but irrelevant responses)
- **AW** alternative wording (where responses vary more than usual)
- **AVP** alternative valid point (where a greater than sual variety of responses is expected)
- ORA or reverse argument
- o <u>underline</u> actual word underlined must be used by candidate (grammatical variants excepted)
- o **max** indicates the maximum number of marks that can be given
- + statements on both sides of the + are needed for that mark
