

Cambridge O Level

CHEMISTRY

Paper 3 Practical Test

CONFIDENTIAL INSTRUCTIONS

5070/31 May/June 2022

This document gives details of how to prepare for and administer the practical exam.

The information in this document and the identity of any materials supplied by Cambridge International are confidential and must NOT reach candidates either directly or indirectly.

The supervisor must complete the report at the end of this document and return it with the scripts.

INSTRUCTIONS

If you have any queries regarding these confidential instructions, contact Cambridge International stating the centre number, the syllabus and component number and the nature of the query.
email info@cambridgeinternational.org
phone +44 1223 553554

General information about practical exams

Centres must follow the guidance on science practical exams given in the Cambridge Handbook.

Safety

Supervisors must follow national and local regulations relating to safety and first aid.

Only those procedures described in the question paper should be attempted.

Supervisors must inform candidates that materials and apparatus used in the exam should be treated with caution. Suitable eye protection should be used where necessary.

The following hazard codes are used in these confidential instructions, where relevant:

- **C** corrosive
- **HH** health hazard**F** flammable

- MH moderate hazard
- T acutely toxic
- **O** oxidising
- N hazardous to the aquatic environment

Hazard data sheets relating to substances used in this exam should be available from your chemical supplier.

Before the exam

- The packets containing the question papers must **not** be opened before the exam.
- It is assumed that standard school laboratory facilities, as indicated in the *Guide to Planning Practical Science*, will be available.
- Spare materials and apparatus for the tasks set must be available for candidates, if required.

During the exam

- It must be made clear to candidates at the start of the exam that they may request spare materials and apparatus for the tasks set.
- Where specified, the supervisor must perform the experiments and record the results as instructed. This must be done out of sight of the candidates, using the same materials and apparatus as the candidates.
- Any assistance provided to candidates must be recorded in the supervisor's report.
- If any materials or apparatus need to be replaced, for example, in the event of breakage or loss, this must be recorded in the supervisor's report.

After the exam

- The supervisor must complete a report for each practical session held and each laboratory used.
 - Each packet of scripts returned to Cambridge International must contain the following items:
 - the scripts of the candidates specified on the bar code label provided
 - the supervisor's results relevant to these candidates
 - the supervisor's reports relevant to these candidates
 - seating plans for each practical session, referring to each candidate by candidate number
 - the attendance register.

Specific information for this practical exam

During the exam, the supervisor (**not** the invigilator) must do the experiments in Questions 1 and 2 and record the results on a spare copy of the question paper, clearly labelled 'supervisor's results'.

If chemicals are prepared in more than one batch, clearly labelled supervisor's results must be provided for each batch. The candidates using each batch must be listed on the supervisor's report.

Apparatus

The apparatus listed must be provided to each candidate.

- $1 \times 25 \text{ cm}^3$ pipette
- 1 × pipette filler
- $1 \times 50 \, \text{cm}^3$ burette
- 1 × stand
- 1 × burette clamp
- 1 × funnel for filling burette
- 1 × white tile
- 1 × conical flask or other suitable vessel for titration
- a supply of test-tubes
- 1 × test-tube rack
- 1 × test-tube holder
- 1 × stirring rod
- 1 × boiling tube
- 1 × wash bottle containing distilled water
- 1 × Bunsen burner
- 1 × heat-proof mat
- 1 × spatula
- a supply of teat/dropping pipettes
- 1 × beaker (for washing teat/dropping pipettes)
- paper towels
- red and blue litmus papers
- wooden splints

apparatus normally used in the centre to test for carbon dioxide with limewater

Candidates are expected to rinse and reuse test-tubes and boiling tubes where necessary. Additional tubes should be available.

Materials
The materials listed in the table must be provided to each candidate. An excess of at least 10% of each material must be prepared to cover accidental loss.

	label	per candidate	identity	notes
	C	150 cm ³	0.10 mol/dm ³ hydrochloric acid	Dilute 8.5 cm ³ of concentrated (35–37%; approximately 11 mol/dm ³) hydrochloric acid [C] [MH] to $1 dm^3$ or dilute 100 cm ³ 1 mol/dm ³ hydrochloric acid to $1 dm^3$.
	a	150 cm ³	0.05 mol/dm ³ sodium carbonate	Dissolve 5.3g of anhydrous sodium carbonate, Na_2CO_3 [MH], in each dm ³ of solution.
[F] [HH] [MH] [T] [N] [C]	methyl orange indicator	2 cm ³	methyl orange indicator	See preparation instructions on page 30 of the 2022 syllabus.
Superviso	Supervisors are asked to carry out a standard acid/base titi fall within the required range. It is essential that $25.0{\rm cm}^3$ of	standard acid/ sential that 25.	Supervisors are asked to carry out a standard acid/base titration between solutions P and Q to ensure that the fall within the required range. It is essential that 25.0 cm^3 of Q reacts with between 24.0 cm^3 and 26.0 cm^3 of P .	ration between solutions P and Q to ensure that the concentrations of the two solutions f Q reacts with between $24.0 \mathrm{cm}^3$ and $26.0 \mathrm{cm}^3$ of P .
	Ľ	10cm ³	0.1 mol/dm ³ iron(III) chloride	Dissolve 27 g hydrated iron(III) chloride, $FeCl_3 \cdot 6H_2O$, [MH] [C] , in 1 dm ³ aqueous sodium chloride containing 5 g/dm ³ NaCl.
	S	10 cm ³	0.1 mol/dm ³ ammonium chromium(III) sulfate	Dissolve 6.6g ammonium sulfate, $(NH_4)_2SO_4$, and 33g hydrated chromium(III) sulfate, $Cr_2(SO_4)_3 \cdot 15H_2O$, in 1 dm ³ of distilled water. Note: Any form of hydrated chromium(III) sulfate is acceptable. Do not use basic chromium(III) sulfate.
	aqueous potassium iodide	2 cm ³	0.2 mol/dm ³ potassium iodide	Dissolve 33g potassium iodide in 1 dm 3 of distilled water.
	starch indicator	1 cm ³	freshly prepared aqueous starch indicator (approx. 2% solution w/v)	See preparation instructions on page 30 of the 2022 syllabus.
	ascorbic acid	0.1g	ascorbic acid

- All solutions must be thoroughly mixed.
- Materials must be labelled only as specified in the 'label' column. The identities of chemicals labelled with letter codes, e.g. P, may be different from their descriptions in the question paper. Candidates must use the descriptions given in the question paper.
- If you are unable to source any of these chemicals, you must contact Cambridge International as far as possible in advance of the exam for advice.

Supervisor's report

Syllabus and component number			/	
Centre number				
Centre name	 	 		

Time of the practical session	

Laboratory name/number

Give details of any difficulties experienced by the centre or by candidates (include the relevant candidate names and candidate numbers).

You must include:

- any difficulties experienced by the centre in the preparation of materials
- any difficulties experienced by candidates, e.g. due to faulty materials or apparatus
- any specific assistance given to candidates.

If chemicals have been prepared in more than one batch, list the candidates using each batch.

Declaration

- 1 Each packet that I am returning to Cambridge International contains all of the following items:
 - the scripts of the candidates specified on the bar code label provided
 - the supervisor's results relevant to these candidates
 - the supervisor's reports relevant to these candidates
 - seating plans for each practical session, referring to each candidate by candidate number
 - the attendance register.
- 2 Where the practical exam has taken place in more than one practical session, I have clearly labelled the supervisor's results, supervisor's reports and seating plans with the time and laboratory name/number for each practical session.
- 3 I have included details of difficulties relating to each practical session experienced by the centre or by candidates.
- 4 I have reported any other adverse circumstances affecting candidates, e.g. illness, bereavement or temporary injury, directly to Cambridge International on a *special consideration form*.
